concepts**®

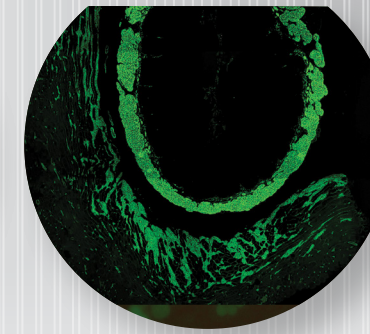

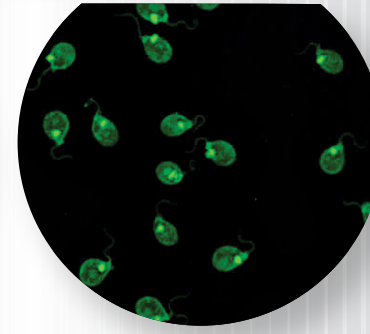

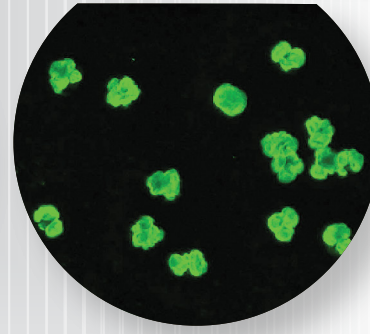

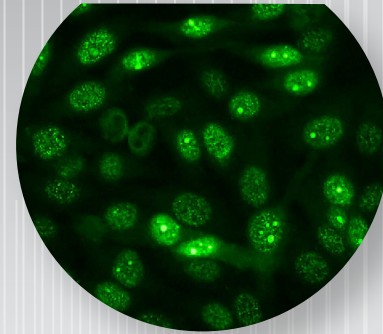

IFA

HEp-2000® ANA

HEp-2000® uses a patented HEp-2 cell line that has been genetically engineered to increase the sensitivity to SS-A/Ro autoantibodies without affecting the other ANA patterns seen. What's the big deal with SS-A/Ro? We would love to show you.

HEp-2 ANA

The original HEp-2 blend that started it all is still available. We continue to grow the original and produce slides for customers all over the world.

HISTOFLUOR® EmA CE

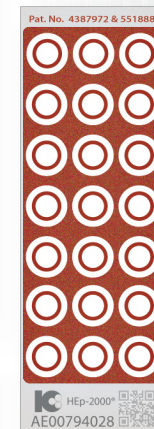

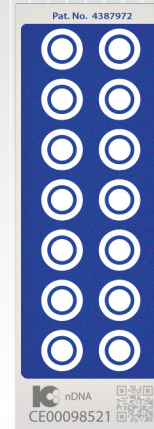

Primate Esophagus used to detect endomysial antibodies. This test system is to be used as an aid in the detection of antibodies associated with celiac disease and dermatitis herpetiformis.

dsDNA

Crithidia lucilliae continue to be the most widely used assay for anti-DNA autoantibody testing worldwide.

ANCA Ethanol

ANCA associated vasculitides require well produced diagnostic slides. This test kit has ethanol-fixed neutrophils.

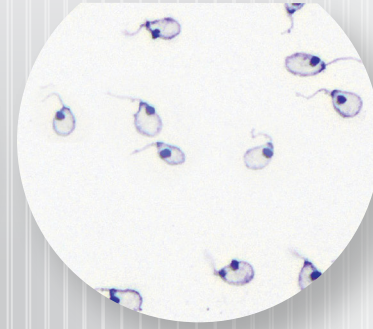

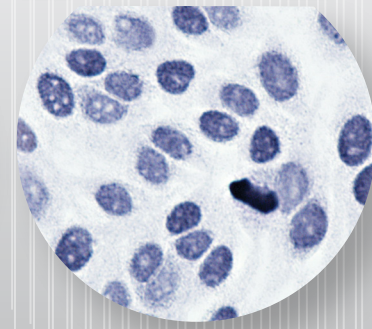

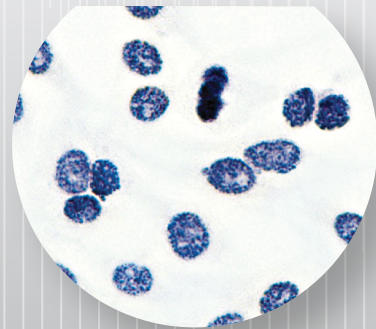

ANCA Formalin

ANCA associated vasculitides require well produced diagnostic slides. This test kit has formalin-fixed neutrophils.

HISTOFLUOR® Rodent Liver / Kidney / Stomach

Our tissue production team can help to design the test kit needed for your process. Mouse LKS or Rat LKS.

COLORZYME®

HEp-2000® ANA

HEp-2000® uses a patented HEp-2 cell line that has been genetically engineered to increase the sensitivity to SS-A/Ro autoantibodies without affecting the other ANA patterns seen. What's the big deal with SS-A/Ro? We would love to show you.

HEp-2 ANA

The original HEp-2 blend that started it all is still available. We continue to grow the original and produce slides for customers all over the world.

dsDNA

Crithidia lucilliae continue to be the most widely used assay for anti-DNA autoantibody testing worldwide.

ELISA

ANA Screen

ENA Single-Well Screen

ENA Multiparameter

MPO

PR3

Cardiolipin - IgG & IgM

dsDNA CE

AUTOMATION

The Universe's Only Open Automated IFA System

Introducing the only **FDA-cleared** automated IFA system in the world utilizing the Immuno Concepts product line to eliminate subjectivity. From slide preparation to image capture and analysis, our system minimizes technologist involvement beyond making correct and confident decisions.
